Preface

The databases maintained by the Jerusalem Institute for Policy Research include comprehensive statistics on a vast array of issues. The purpose of these databases is to support informed decision-making and provide answers for a wide range of audiences on matters relating to Jerusalem.

JIPR's Data Analysis and Services Unit is responsible for collecting, analyzing, and processing data and making it accessible for diverse purposes and audiences. Among other activities, the unit conducts data processing for the Institute's researchers and publishes **the Statistical Yearbook of Jerusalem** as well as **Jerusalem: Facts and Trends**.

Jerusalem: Facts and Trends is a selection of key data from **The Yearbook** and its presentation through text and graphs. Both publications can be found on JIPR's website. The publication before you is a concise version of the **Jerusalem: Facts and Trends**.

All three publications would not have been possible without the support of the Ministry of Jerusalem and Heritage, the Jerusalem Development Authority, the Jerusalem Municipality, and the Leichtag Foundation. We are grateful for their support, and we hope that these publications will facilitate their important work in Jerusalem.

Finally, we would like to thank Yael Shaulski, the graphic designer of **Jerusalem: Facts and Trends** since 2017, for the professionalism and creativity she brings to this work.

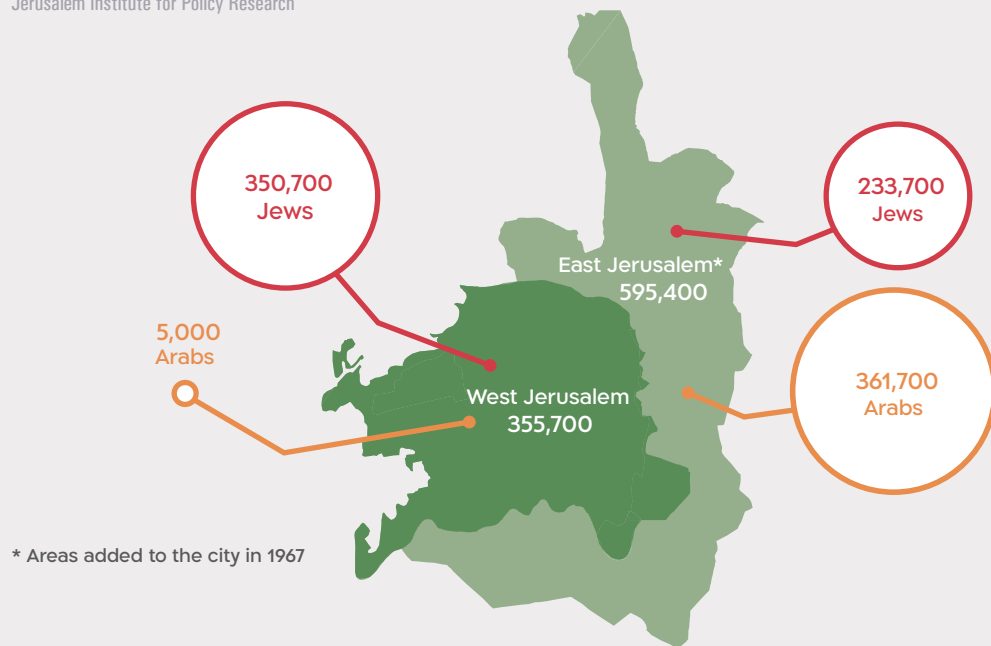

Population of Jerusalem and Major Israeli Cities, 2020

Jerusalem Institute for Policy Research

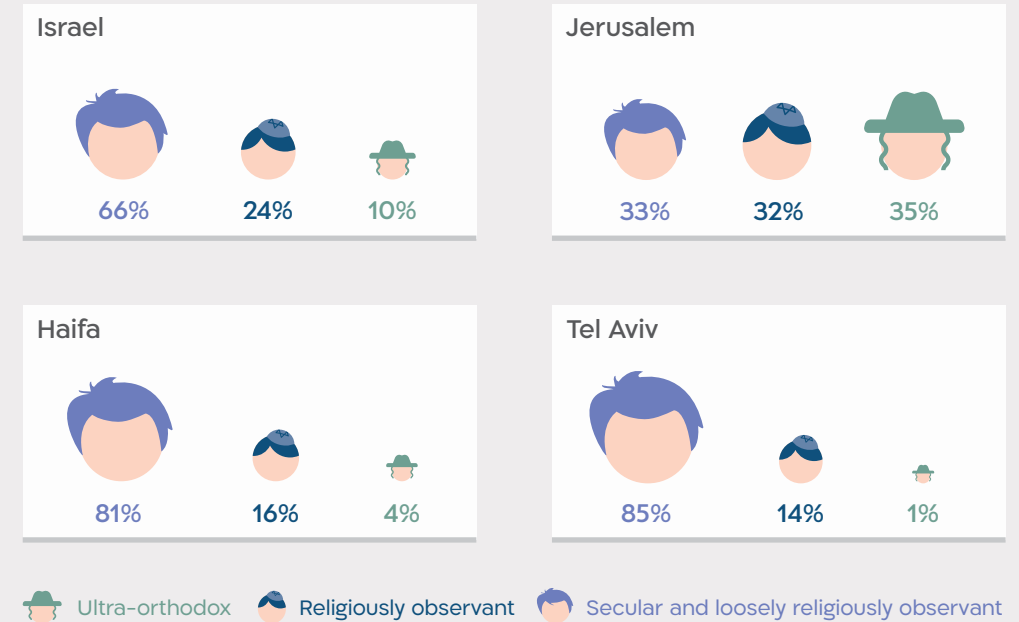

Geographical Distribution of the Jerusalem Population, 2020

Jerusalem: Facts and Trends, published annually in advance of Jerusalem Day, presents a concise, up-to-date, and informative picture of the current state of affairs in Jerusalem and trends of change over time. This publication provides policymakers and the general public with comprehensible data on developments in the city across a wide range of issues, including population, welfare, employment, education, housing, and tourism. A complete and detailed presentation of the data appears in the Statistical Yearbook of Jerusalem, published on the Institute's website.

The Jerusalem Institute for Policy Research is a research institute and think tank that advances a sustainable social, economic, and spatial doctrine originating in Jerusalem. JIPR, founded in 1978, is the source to which policymakers turn for the clarification, furtherance, and delineation of core issues in research on Jerusalem and Israel. JIPR's studies and activities assist various entities and institutions in designing and implementing innovative and effective policy. For JIPR, Jerusalem serves as a source of inspiration, a field of study, a laboratory, and a target area for influence efforts. Advancing Jerusalem's development for the benefit of its diverse residents, admirers, and believers, and reinforcing its international standing, are at the top of JIPR's agenda.
